

*Magdalena Dawidowicz was born on November 29, 2005 in Olsztyn. Currently, she is a student in the last year of II LO in Olsztyn with a mathematical and physical profile. She was instilled with the passion for painting by her grandmother, with whom she passionately created various drawings in her early childhood. She was a laureate of multiple pre-school and school art competitions. She has been interested in art with enthusiasm since she was a child, studying painting techniques instructor books on her own. She practised various techniques with commitment. However, she prefers paintings painted with acrylics on medium-sized canvases in the realistic and impressionistic style and graphics coloured with crayons and markers. Their main themes are landscapes, portraits and animals. She presents her works at school vernissages and on the occasion of cultural events in the city (e.g. on the theme of "Guardian Angels", "Butterflies", and "Shells") and makes portraits and graphics to order. She connects her future with architecture; painting is her lifelong passion and springboard.*
